## Abbreviations - and symbols Directory

PS	Maximum allowable pressure	$p_{\bar{u}}$	Excess pressure in bar	ü.N.N	above sea level
$p_u$	inlet pressure	$p_{amb}$	ambient pressure		The mean sea level (also sea level, abbreviated NN or NN)
$\Delta p$	loss of pressure	$Q_n$	Standard - Volume Flow		was 1879 to 1992 the fixed zero level of the official height reference in Germany
$w_u$	Gas - entry speed	$Q_b$	Operation - Volume Flow		
$\rho_{n\ Gas}$	Gas - normal density	t	temperature		

# Application, Features , Technical Data

## Application

Type DF 100 cellular gas filters are designed for retaining gas impurities, such as dust, rust and other solid particles, in gas-carrying lines at a defined location. They are mainly used in gas pressure regulating and measuring stations and upstream of equipment, the function of which would be impaired by contaminants.

Can be used as an equipment component for gas consumption systems according to Regulation (EU) 2016/426.

The filters are suitable for gases in accordance with DVGW Code of Practice G 260 / G 262 and neutral non-corrosive gases. (Other gases on request).

## Features

- Outdoor version as standard
- Easily replaceable filter cartridge with hydrophobic filter medium
- Optimized flow control ensures high filtration efficiency
- Optionally available with differential pressure measurement  
(for electric remote transmission , differential pressure gauge with limit switch)

Cellular Gas Filter DF 100 DN 50

Cellular Gas Filter DF 100 DN 50 with Differential pressure measuring device

## Technical Data

Type	DF 100												
Maximum permissible pressure (PS)	16 bar												
Nominal size	DN 25 / 50 / 80 / 100 / 150 / 200												
Connection type	DIN - flanges PN 16 ASME - ANSI B16.5 - flanges Class 150 RF												
Werkstoff	<table border="0"> <tr> <td>body</td> <td>- Aluminum*</td> </tr> <tr> <td>filter</td> <td>- Polyester reinforced cellulose paper</td> </tr> <tr> <td>gasket</td> <td>- NBR</td> </tr> </table>	body	- Aluminum*	filter	- Polyester reinforced cellulose paper	gasket	- NBR						
body	- Aluminum*												
filter	- Polyester reinforced cellulose paper												
gasket	- NBR												
Temperature range (operating / ambient temperature)	- 20°C to + 60°C (- 40°C to + 70°C on request)												
Filter area	<table border="0"> <tr> <td>DN 25</td> <td>- 0,0510m<sup>2</sup></td> <td>DN 100</td> <td>- 0,9300m<sup>2</sup></td> </tr> <tr> <td>DN 50</td> <td>- 0,2430m<sup>2</sup></td> <td>DN 150</td> <td>- 2,5000m<sup>2</sup></td> </tr> <tr> <td>DN 80</td> <td>- 0,4500m<sup>2</sup></td> <td>DN 200</td> <td>- 3,0000m<sup>2</sup></td> </tr> </table>	DN 25	- 0,0510m <sup>2</sup>	DN 100	- 0,9300m <sup>2</sup>	DN 50	- 0,2430m <sup>2</sup>	DN 150	- 2,5000m <sup>2</sup>	DN 80	- 0,4500m <sup>2</sup>	DN 200	- 3,0000m <sup>2</sup>
DN 25	- 0,0510m <sup>2</sup>	DN 100	- 0,9300m <sup>2</sup>										
DN 50	- 0,2430m <sup>2</sup>	DN 150	- 2,5000m <sup>2</sup>										
DN 80	- 0,4500m <sup>2</sup>	DN 200	- 3,0000m <sup>2</sup>										
Filtration efficiency	Standard 99.9 % of particle size > 2 µm **												
Approximate Δp value for new filter cartridge	Δp ≤ 50 mbar if the gas velocity at the filter inlet is $W_u = 20 \text{ m/s}$ ***												
Approximate Δp value for filter cartridge change	800 to 1.000 mbar												
Δpmax limit for soiled filter cartridges	Δp <sub>max</sub> = 2.000 mbar												
Dust holding capacity	135 mg/cm <sup>2</sup>												
Function, strength and tightnessst	DIN 3386, DVGW Code of Practice G 498 and DIN 30690-1												
CE mark acc. to PED / PIN No.	CE-0085CP0531												
Explosion protection	The mechanical components of the device do not contain any potential ignition sources of their own; thus they do not fall under the scope of ATEX 95 (94/9/EC). The electrical components of the device comply with ATEX requirements.												

\*) Corrosivity category according to DIN EN ISO 12944-2.

The categories C1 to C5-I including guaranteed without additional coatings.

For the category C5-M a coating with epoxy resin is recommended.

\*\*) Other designs on request

\*\*\*) If the gas velocity at the filter inlet is 20 m/s, the gas velocity through the filter element is approx. 0.14 - 0.22 m/s depending on the nominal size. (A much lower flow velocity is recommended when high levels of dust are to be expected.)

## Design and function

Gas flows through the inlet flange into the filter body.

The filter area which is up to or more than 100 times larger than the cross-section of the inlet flange reduces the velocity of the gas flow accordingly. The dust particles carried along with the gas are retained by the filter element. The cleaned gas is discharged through the outlet flange.

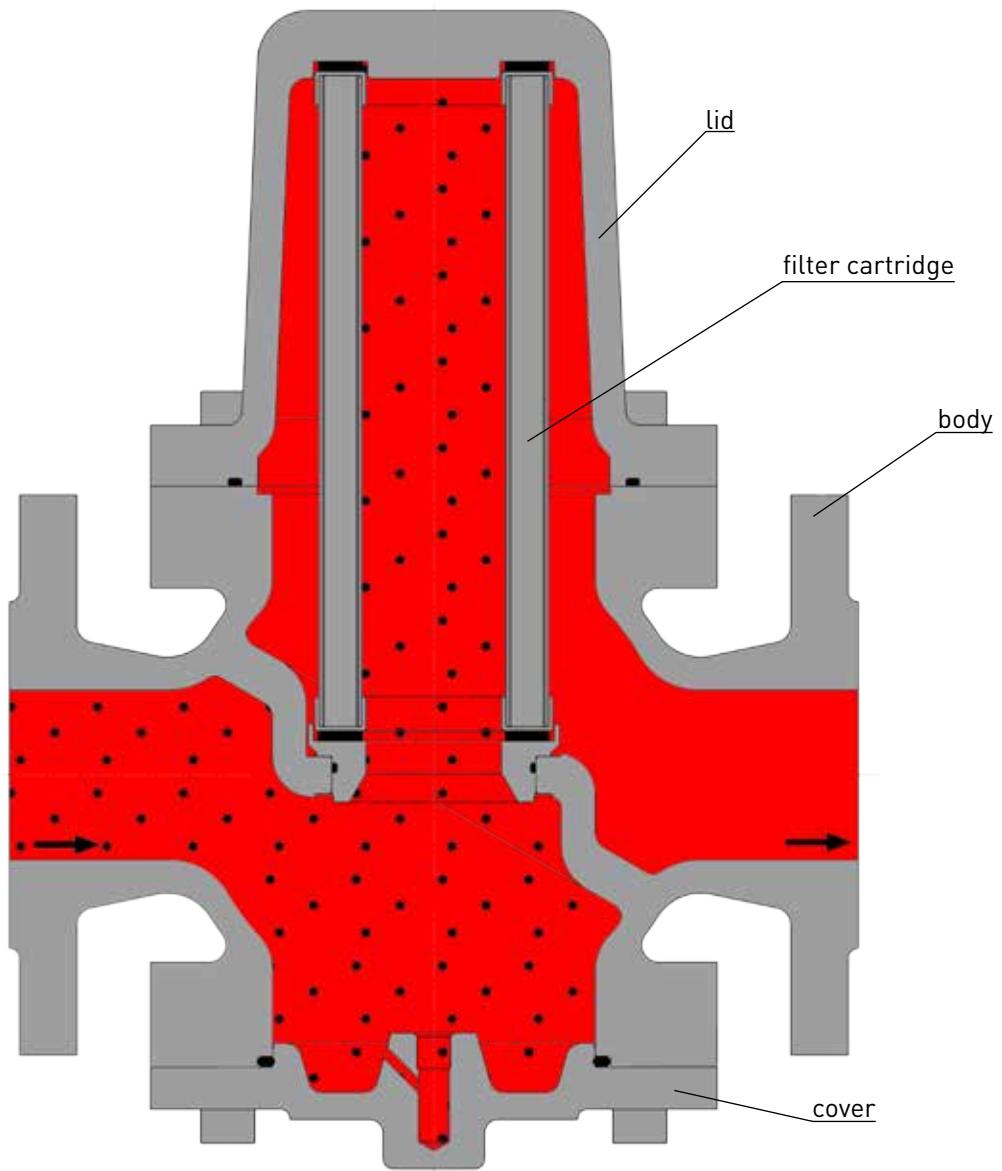

A filter mainly consists of a body , a lid and a filter cartridge. The filter cartridge can be easily accessed for maintenance or replacement by removing the lid. The filter cartridge comprises a filter basket and a filter element.

A filter cartridge with an appropriate pore size according to the application and the particle size to be filtered should be used. The filter cartridge is sealed by two sealing rings which are mostly integrated within the filter cartridge.

The cover on the underside of the filter allows a comfortable distance incurred residues (dismounting 40mm).

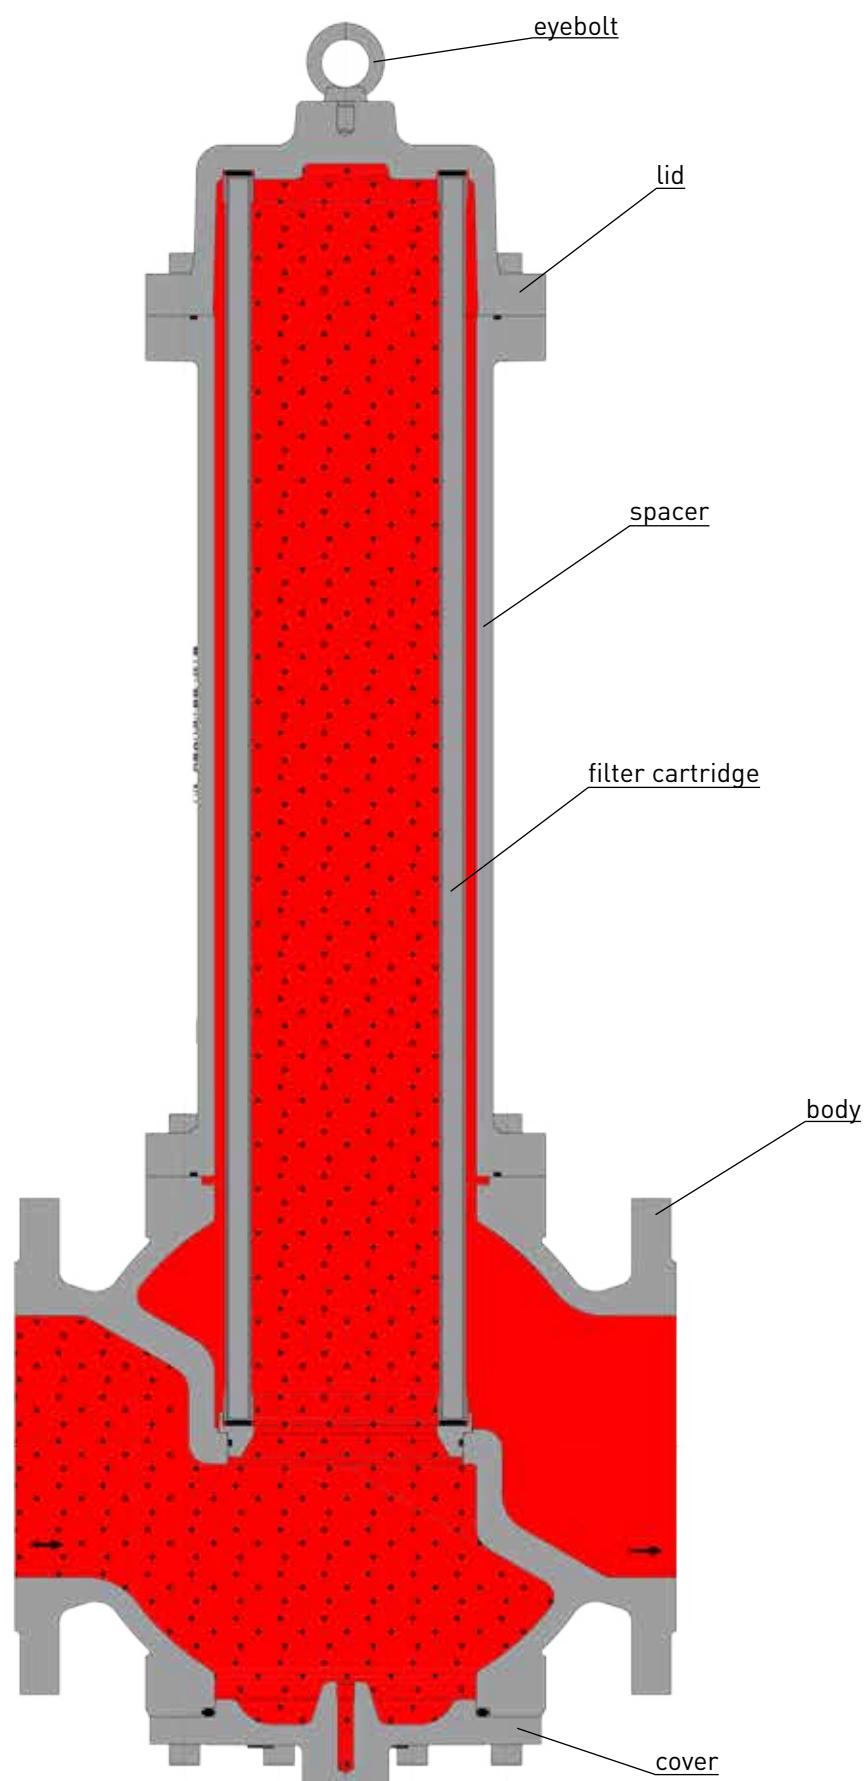

The nominal widths DN 150 and DN 200 are equipped with an eyebolt M10 for installation.

### DN 25 / 50 / 80 / 100

**DN 150 / 200**

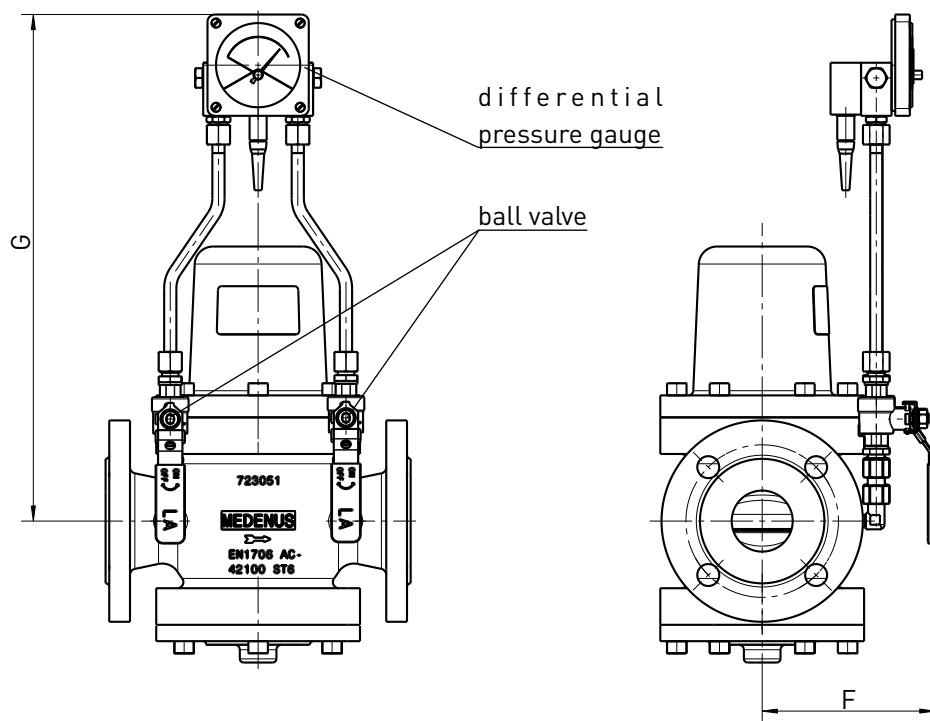

(with spacer and eyebolt)

shown DN 50

## Schematic view of the differential pressure measurement device

DN 25 / 50 / 80 / 100 / 150 / 200

shown DN 50 PN 16 with differential pressure measuring device and reed contact  
(Ball valve in operating position)

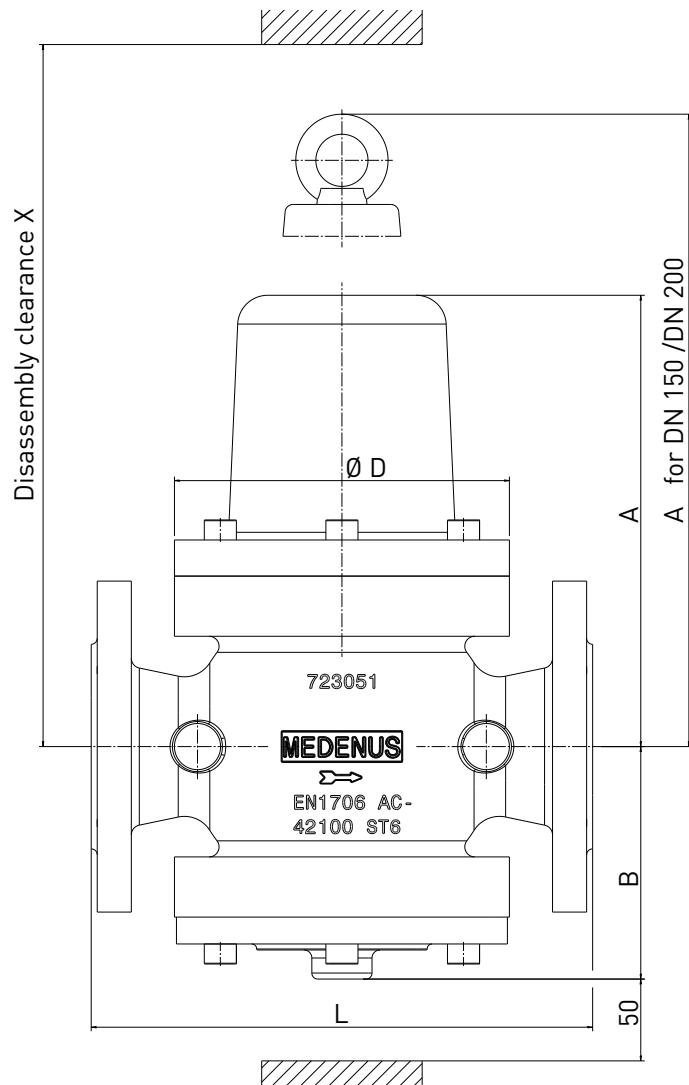

Filters of all nominal sizes can be equipped with a differential pressure measuring device to check the degree of contamination of the filter element.

The version for electric remote transmission is supplied with a differential pressure gauge with reed contact. The differential pressure measuring device can be mounted depending on the ordered flow direction of the filter. If desired, the connecting lines are each equipped with a ball valve.

### Dimensions of differential pressure measuring device (mm)

Nominal sizes	G	F
DN 025	355	146
DN 050	415	141
DN 080	432	153
DN 100		171
DN 150	452	193
DN 200		234

## Dimensions, connection and weight

Dimensions	Nominal sizes	DN 25	DN 50	DN 80	DN 100	DN 150	DN 200
A [mm]		102	225	317	404	817	954
B [mm]		80	116	138	188	195	225
D [mm]		92	167	167	200	230	280
L [mm]		160	250	280	350	380	420
X [mm]		192	350	512	546	905*	1040*
Weights [kg]		3,0	9,0	12,0	23,0	41,0	62,0
Capacity of the pressure chamber (l)		0,6	2,7	4,8	12,6	25,4	46,6

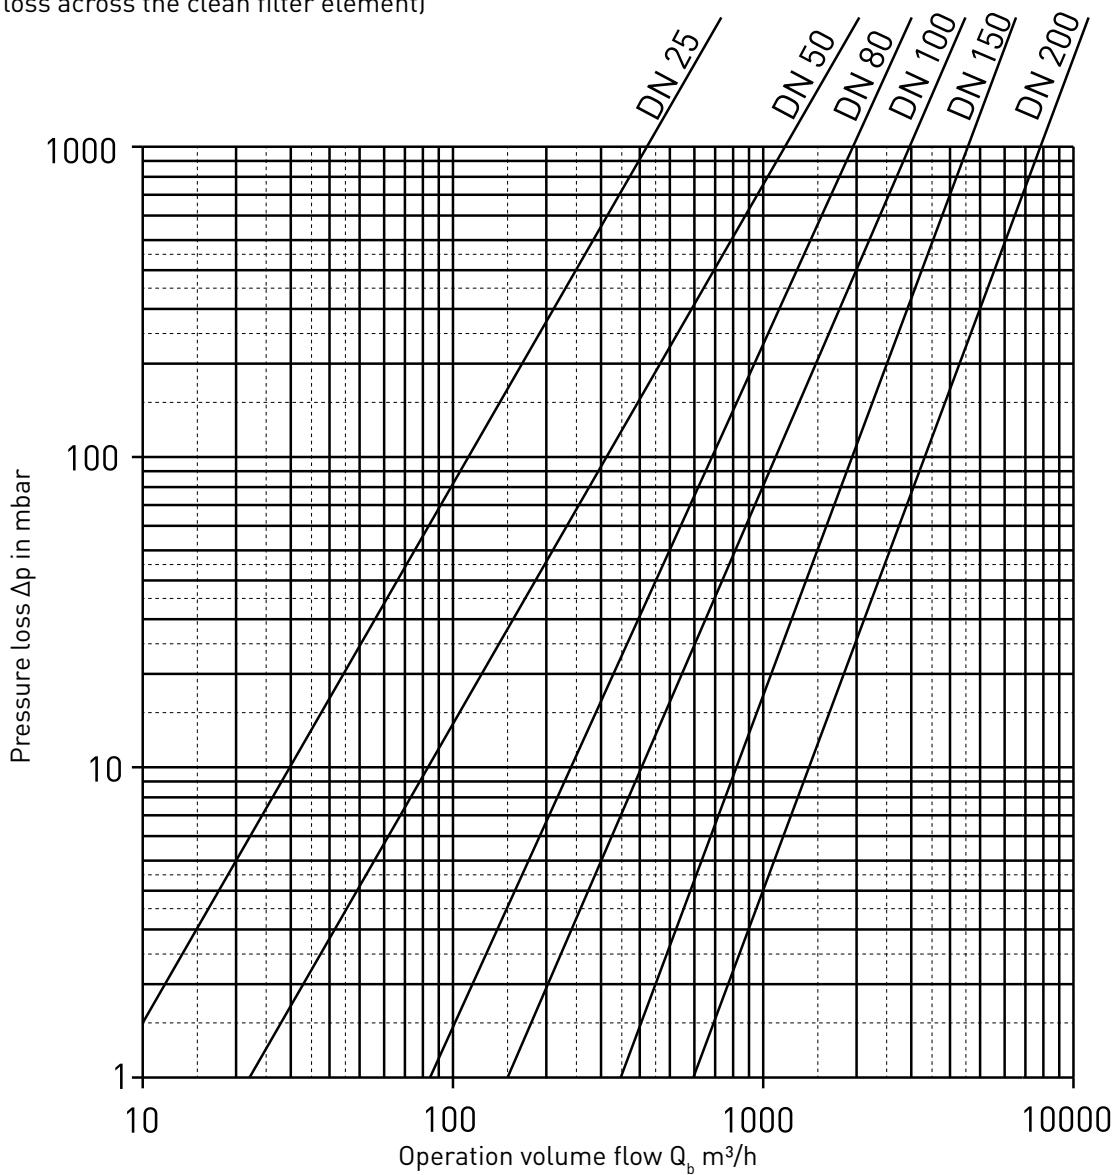

- Connection for differential pressure measuring device G 1/4"
- Eyebolt for DN 150 /DN 200 M10
- Connection type (standart): each side DIN - flanges PN 16

\*) we recommend: DN 150 - 1260 mm / DN 200 - 1475 mm

## Performance data

### Performance diagram

(Pressure loss across the clean filter element)

### Recommended maximum Operation volume flow rate $Q_b$

DN 025	DN 050	DN 080	DN 100	DN 150	DN 200
100 $\text{m}^3/\text{h}$	400 $\text{m}^3/\text{h}$	1000 $\text{m}^3/\text{h}$	1700 $\text{m}^3/\text{h}$	3800 $\text{m}^3/\text{h}$	6800 $\text{m}^3/\text{h}$

**Example:** at  $Q_b = 100 \text{ m}^3/\text{h}$  and DN 25:  $\Delta p_{\text{Diagramm}} = 80 \text{ mbar}$

**Operation volume flow  $\text{m}^3/\text{h}$  und Standard volume flow  $\text{m}^3/\text{h}$ :**

$$Q_b = \frac{1,01325 \cdot Q_n \cdot (t + 273,15)}{273,15 \cdot (p_u + p_{\text{amb}})}$$

$$Q_n = \frac{273,15 \cdot Q_b \cdot (p_u + p_{\text{amb}})}{1,01325 \cdot (t + 273,15)}$$

above sea level (m)	0	200	500	1000	2000	4000	6000	8000	11000
$P_{\text{amb}}$ (bar)	1,01315	0,989	0,955	0,899	0,795	0,616	0,472	0,356	0,226

### Notice

These values are valid for natural gas  $\rho_{n \text{ Gas}} = 0,83 \text{ kg/m}^3$  and  $t = 15^\circ\text{C}$ .

If other types of gas are used, the pressure loss is to be calculated as follows  $\Delta p = \rho_{n \text{ Gas}} / 0,83 \cdot \Delta p_{\text{Diagramm}}$

## Ordering data

### Example:

		Cellular Gas Filters: DF100/050/links/D/R/T/WAZ/So

Im Langen Feld 3

## **THE MEDENUS PLUS**

### 10 reasons for good business relations

1. Consultancy expertise and quality standards developed over decades
2. Broad and proven standard range of feedback controllers
3. Modern, fast and efficient production for series products and for individual orders
4. Customized design of pressure regulators and vacuum regulators and special designs
5. Guaranteed deadline compliance with a delivery time guarantee
6. Fast response time in all matters
7. Sufficiently large parts storage for production and spare parts
8. Customized theory & practice training courses
9. Modular design right across the entire product range to facilitate optimized handling of spare parts
10. 100% Made in Germany
