

Precise surveying and measuring

## Nedo Auto-mEssfix

Robust telescopic gauge for quick checking and measurement of deformed vehicle body parts

**NEDO Auto-mEssfix**

## Nedo Auto-mEssfix

The Nedo **Auto-mEssfix** is the telescopic gauge for quick checking and measurement of deformed or already restraightened vehicle body parts. Ideal for assessing the extent of damage, measuring structural damage or for checking of dimensions after restraightening. You simply pull out the extending sections and read off the distance between two measurement points from the analogue display. Quick, reliable and precise. Choose from three sturdy models. The two larger models are fitted with clamping screws for fixing the extendable tubes; this prevents inadvertent displacement of the settings.

### Nedo Auto-mEssfix

Ref.-No.	Measuring range	Length retracted	Graduation	Weight
F 281 119	415 to 945 mm	415 mm	mm	1.3 kg
F 281 219	920 to 2610 mm	920 mm	mm	1.8 kg
F 281 319	950 to 3260 mm	950 mm	mm	2.0 kg

Delivery includes two of each of the illustrated measuring accessories.

Measurements in almost inaccessible places can be made with the aid of spikes which are supplied as a standard. Distances between two points lying in different planes are determined rapidly and easily. The delivery also includes measuring cones that allow for measurements of intervals between holes.
