

FAG Top-Laser EQUILIGN

For aligning shafts in no time at all

Optimum operating life of couplings, bearings and seals is ensured by the FAG Top-Laser EQUILIGN

- Prevention of coupling damage
- Reduced vibration and friction losses
- Significantly reduced energy consumption
- Easy to handle and measurement documentation

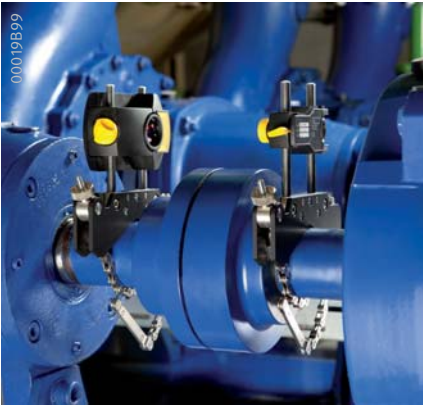

**simply switch on
+
get started**

Delivery scope of the FAG Top-Laser EQUILIGN

The FAG Top-Laser EQUILIGN is easy to handle

Fitted sensors

The FAG Top-Laser EQUILIGN is suitable for aligning coupled and uncoupled shafts of:

- motors
- pumps
- ventilators
- gearboxes
- fans
- compressors

Your advantages

- **Easy to handle**
 - complete package: Simply switch on and get started
- **User-friendly**
 - due to graphical operating instructions
- **Simple tolerance check**
 - misalignments are clearly displayed
- **Design is suitable for industrial applications**
 - waterproof and resistant to contamination (protection grade IP65)
- **Problem-free power supply**
 - easy to operate with rechargeable batteries
- **Reliable real-time display**
 - display of horizontal and vertical movements during alignment
- **Reduced repairs**
 - early detection of incorrect alignments
- **Reduced costs**
 - due to noticeably reduced energy consumption
