

2/2-way Angle-Seat Valve with weld end connection, DN 15-65

- High flow rate and long life cycle
- For hygienic connections with weld end bodies
- NC and NO universal actuators with modular universal accessory program up to control heads

Type 2000 can be combined with...

Type 8697

Electrical position feedback

Type 8640/8644

Valve block

Type 6012/6014 P

Pilot valve

For process valves with decentralized automation see ELEMENT Type 2100

The externally piloted angle-seat valve is operated with a single or double-acting piston actuator. The actuator is available in two different materials, PA and PPS depending on the ambient temperature. The reliable self-adjusting packing gland provides high sealing integrity. High flow rates are attained with the stainless steel 2-way body.

These maintenance-free and robust valves can be retrofitted with a comprehensive range of accessories for position indication, stroke limitation or manual override.

For valves with port connection Clamp and threaded port please see separate datasheets.

1) Note: For PA actuators in the sizes 50 and 63, the combination of max. medium temperature and max. ambient temperature is as shown in the following chart

Ordering information for valve system On/Off CLASSIC Type 8801-YA

An **angle seat valve Type 2000** can be combined with the **feedback Type 8697** to form a **valve system On/Off CLASSIC**.

The valve system On/Off CLASSIC is composed of:

- a feedback **Type 8697** (see separate datasheet) [More info.](#)
- an angle seat valve **Type 2000** (see ordering chart p. 3)

For the configuration of further valve systems please use the "Request for quotation" on p. 10. [go to page](#)

You order two components and receive a complete assembled and certified valve.

Feedback Type 8697

Valve System On/Off CLASSIC

**Type 8801-YA-U
2100 + 8697**

Electrical position feedback

[More info.](#)

Type 8697

Actuator size 40 to 225

The pneumatic control unit Type 8697 is designed for integrated mounting on CLASSIC series 20XX process valves suiting the requirements of hygienic process environment. Mechanical or inductive limit switches register the position of the valve.

Features

- Compact design
- LED position indicator
- Mechanical or inductive limit switches for end position registering
- Easy to clean chemically resistant housing featuring IP65 / IP67, 4X Rating
- Optional intrinsically safe version acc. to ATEX

Benefits

- Easy and quick installation
- High level of signal reliability thanks to self adjusting limit switches
- Signal safety through the automatic adjustment of the limit switches
- Minimised space requirement in the plant piping for more flexibility in plant design

Click on the orange box „More info“... you will come to our website for the resp. product where you can download the data sheet.
