

ELECTRONIC HYGROTHERM

ETF 012

- > Efficient temperature and humidity control
- > Wide voltage range

- > Operating temperature down to -40 °C
- > High switching capacity
- > DIN rail mountable

The ETF 012 senses the ambient temperature and relative air humidity in an enclosure. Depending on which contact combination is chosen, it then turns on or off a connected device if either the temperature is below or the humidity is above the set point. The integrated LED in each adjustment knob is lit when indicating the active function.
