

Stack lights

370 Serie

Modular **stack** light

Ø 70

Modular stack light with standard diameter (Ø 70 mm) able to use **multicolor and multifunction** modules.

The 370 is the first stack light able to overlap up to 7 modules.

The quality, duration and innovative technical solutions are the basis of its success.

Technical features

Compliance

Directive CEE 2014/35 Low voltage - Directive CEE 2014/30
Electromagnetic compatibility - Directive CEE 2006/42 Machinery

Conformity to standards

EN 60204.1 - EN 60947.5.1 - EN 60073 - EN 60529 -
EN 60068.2.6 - EN60068-2-27 - EN ISO 7731 - EN 981 - IEC 536

Material

Visual and audio module, cable unit, polycarbonate cap and base.
Anodised aluminium or polycarbonate tube.
Nylon glass fiber fitting for 90 ° fixing.

Operating voltage

240 V max.

Protection degree

IP 64 (if correctly assembled with cap and gasket)

Homologations

UL, CSA, CE

Protection against electric shock

Class II, double safety insulation with polycarbonate poles.

Class I with metal poles according to IEC 536.

Operating temperature

- 20° C + 50° C (12V 40°C)

Resistance to vibrations

2 day min (10-150 Hz) according to EN 60068-2-6.

Modules color

Bulb

Bayonet connection type BA 15d - 5W max.

With flash circuits Xenon bulb

Number of combinable units

Max 7 units (excluding the single lamp version which allows a maximum of 2)

Connections

With screw cable clamp, M12 connector 5 and 8 poles, or
5-poles cable

Connection ID Code

Common marking "C" to all signal units. Mark 1 to 7 references for each individual unit from below.

Terminal units

Its the connection unit between modules and the control circuits.
Essential for the correct functioning of the light column.

Standard terminal unit

The connection terminal block has 8 terminals, allows the assembly of 7 light sectors or alternatively 6 light sectors plus an acoustic module. Possibility of direct installation or on polycarbonate extension pole.

Classe II

Operating temperature

-20/+50 C°

Material

Bayblend

Terminal unit with magnetic seal

Easy assembly without drilling. Great flexibility of use, possibility of rapid repositioning. Perpendicular installation without problems. Equipped with M12 cable gland for lateral cable entry. We recommend the use of a maximum of 5 signaling modules (4 luminous + 1 acoustic). Equipped with cap top cover when the acoustic device is not used.

Quadricolor module

Light module with **bright and diffuse LED**. In the presence of 2 or more alarms, the module lights up alternately in the colors corresponding to the event. It has a lens with horizontal and vertical lines for a correct diffusion at 360 °.

Two other sectors can be stacked in addition to the Quadricolor sector.

Code	Colors	Bulb	Functions	Sound	Operating Voltage	Current consumption
4Q1B 5632		LED	Steady light Flashing light	Pulse or continuous	24V DC-AC	110 mA

Tricolor module

Light module with **bright and diffuse LED**. In the presence of 2 or more alarms, the module lights up alternately in the colors corresponding to the event. It has a lens with horizontal and vertical lines for a correct diffusion at 360 °.

Three other sectors can be stacked in addition to the Tricolor sector.

Code	Colors	Bulb	Functions	Sound	Operating Voltage	Current consumption
4T1B 532		LED	Steady light	Pulse or continuous	24V DC	100 mA
4T5B 532		LED	Steady light	Pulse or continuous	24V DC	100 mA

	29-12	29-24	29-48	29-15	29-30

Differentiated light, bulbs included.

Strobe module with Xenon lamp

Strobe module ideal for drawing attention.

The yellow and blue colors enhance the characteristics of **Xenon** lamps.

Eco-friendly design; recyclability, reusability and reparability.

Technical features

Type of optics

lens with triangular rifling horizontal and vertical for a correct 360° diffusion

Light source

The module uses XENON gas. This source produces a short, intense flash. The white light is similar to sunlight but not to continuous spectrum.

Flashing frequency

about 1,4 Hz (84 flashes per minute)

Operating voltage

from 24 V to 240 V

Current consumption

24 V dc, 75 mA - 24 V ac, 135 mA

115 V ac, 20 mA – 240 V ac 15 mA

	36-24	36-15	36-30
	39-24	39-15	39-30

Light module ideal for remote signalling.

Multifunction module LED

Programmable LED module, 2 functions: **Flashing or steady** light, ensures safe communications and simple storage management.
Eco-friendly design; recyclability, reusability and reparability.

Technical features

Type of optics

lens with triangular rifling horizontal and vertical for a correct 360° diffusion

Light source

SMD high brightness LEDs

Differentiated light: Progressive color variations of the module delete the possibility of incorrect communications

Diffused light: the module is illuminated evenly over all its surface

Functions

Flashing or steady (to change the function move the internal jumper)

Flashing frequency

Min 1 Hz max 2 Hz

Operating voltage

24 V AC/DC

Current consumption

50 mA (unchanged for all types of lighting)

Colored module

Avoid false alerts caused by reflection of sunlight (Phantom effect).

Multifunction module high brightness LED

Multifunction LED module, 7 lighting's types: steady, flash, rotating, fast rotating, flashing, fast flashing, alternating flashing. Maximum flexibility, meets any signalling requirements.

Eco-friendly design; recyclability, reusability and reparability.

Technical features

Type of optics

lens with triangular rifling horizontal and vertical for a correct 360° diffusion

Light source

36 SMD high brightness LEDs

Differentiated light: Progressive color variations of the module delete the possibility of incorrect communications

Diffused light: The module is illuminated evenly over all its surface

Functions

Steady, flashing, flash and rotating (to change the fun-

ction move the internal jumper)

Flashing frequency

Min 1 Hz max 2 Hz

Rotating frequency

about 1 Hz (60 rotating per minute)

Operating voltage

24 V AC/DC

Current consumption

24 V dc, 55 mA; 24 V ac, 85 mA

(unchanged for all types of lighting)

M4T7B 632		LED	Steady light Flashing light Rotating light Multifunction	Pulse or continuous	24V DC / AC	100 mA

Combined light and acoustic LED module

Combined light and acoustic module is a multi-purpose product. It's used as last sector or also as single beacon. Multichannel and powerfull acoustic device.

Technical features

Type of optics

lens with triangular rifling horizontal and vertical for a correct 360° diffusion

Light source

SMD high brightness LEDs

Differentiated light: Progressive color variations of the module delete the possibility of incorrect communications.

Diffused light: The module is illuminated evenly over all its surface.

Functions

Flashing, rotanting or steady (to change the function move the internal jumper)

Sound

Pulse or continuous with possibility to change tone remotely

Operating voltage

24 V DC

Current consumption

50 / 130 mA (unchanged for all types of lighting)

Combined light and acoustic module

The combined light and acoustic warning device is also widely used as a single warning, in the stack lights can be used only as last sector. Ideal for attracting attention in higher-risk applications.

Technical features

Type of optics

lens with triangular rifling horizontal and vertical for a correct 360° diffusion

Light source

Filament bulb with bayonet connection type BA 15d - 5 W or LED bulbs. The module is without bulb.

Differentiated light: Progressive color variations of the module eliminate the possibility of wrong communications.

Functions

Steady light

Sound

Pulse or continuous with possibility to change tone remotely

Operating voltage

24 V DC / AC

Module color	Codes and data for ordering

Bitonal audio signal device type 71 and 72

The **bitonal audio signal device** is used to attract the attention of operators in all high-risk processing. This is used both on stack light and as single device.

Technical features

Sound

pulse or continuous

Sound frequency

3300 - 3700 Hz

Signal repetition rate

0,5 Hz

Operating voltage

24 V DC/AC - 115 / 230 AC

Current consumption

24 V DC, 32 mA - 24 V AC, 35 mA

230 V AC, 20mA

Protection degree

type 71, IP30 - type 72, IP64

The audio signal device is used as the last module on the stack lights.

Bitonal audio signal device type 73

The **bitonal audio signal device** is used to attract the attention of operators in all high-risk processing. This is used both on stack light and as single acoustic device. Good sound power and protection degree.

Technical features

Sound

pulse or continuous

Sound frequency

2900 Hz

Signal repetition rate

0,5 Hz

Operating voltage

24 V DC/AC - 115 / 230 AC

Current consumption

The audio signal device is used as the last module on the stack lights.

Bitonal audio signal device type 77

The **audio signal device** reinforces the light module in all those high-risk processing where it is necessary to draw the operators' attention. This is used both on stack lights and as single device.

Technical features

Sound

pulse or continuous

Sound frequency

2600 Hz

Signal repetition rate

0,5 Hz

Operating voltage

24 V DC/AC - 115 / 230 AC

The audio signal device is used as the last module on the stack lights

Anti-removal block

- It is a screw that blocks rotation preventing easy removal.
- The light column with these characteristics is supplied assembled.

Cod. -0Q

Add the code after each selected sector.

Exclusive colors

Cod. 90-0x/1018

Exclusive color

Cod. 54-0x/1018

RAL 1018 - Add after each selected component

Terminal unit, base and extension tube
in the color you want!

To meet your every need we create **mini-series in the colors indicated by the customer.**

The supply is possible in all **RAL colors**, for some verification is necessary. Small differences are possible between the various lots

A simple **rotative motion** permitted easy mounting without any tools.

Simplifies the removal of light units after testing. Reduces the volume of machines during shipment.

Saves on packaging and transport costs.

Combined with the connector allows a quick and error-free installation.
