The indicated powers refer to the operating mode S1 at an ambient temperature up to 40°C and an altitude up to 1000 m above sea level.

This table lists the motor data of the square product line in enclosure IP 21 with radial mounted force cooling.

These four-pole motors are designed especially for operation with wide speed range at the frequency converter.

Motor insulation class H, rise F acc. DIN EN 60034.

Usual IEC designs are available in compliance with DIN EN 60034 with standardized mounting dimensions according EN 50347. Accessories, e.g. tachogenerators, brakes and gear boxes in various designs are possible.

Other rating speed, power and voltage are available.
