ARTESYN µMP SERIES GEN II

Up to 1800 Watts with New Product Enhancements

Advanced Energy's Artesyn µMP series GEN II power supply is a configurable power supply with market-leading density and efficiency. It features a very wide 85 to 264 VAC input voltage range and employs active power factor correction to minimize input harmonic current distortion and to ensure compliance with the international EN61000-3-2 standard – they have a power factor of 0.99 typical. The power supplies also feature active AC inrush control to automatically limit inrush current at turn-on to 40 A maximum.

µMP HUP MODULE

The µMP HUP module is intended for use on µMP09 with high efficiency module (SK*) configurations. In such case, only one HUP can be used per case.
Its application is limited with µMP09 and µMP04 configurations and may have multiple HUP's inserted.

The HUP module shall provide additional 224µF bulk capacitance (typ.). Typical hold-up time increase with HUP module in µMP09 case and SK* module is 10ms at 500W load.
