Order-No.: **09840-10**

Type: **Adjusting target for
night view assistant**

The adjusting target for night view assistant (2) is a colourless anodized target for the adjustment of the camera for the night view assistant system.

The target (2) is located via magnets in a fixed determined height (1378 mm) at the headlamp aiming device (1) and aligned to the horizon with a water-level (3). The offset – values of the different vehicle types are given by Daimler AG. The camera which is at the vehicle in a fixed position adjusts itself with the help of the adjusting target (2).

For the Hella – headlamp aiming device with support rotated by 45° degrees an additional adaptation plate (order-no. 09840-11) can be requested.

Modifications and errors reserved, 12/01/2009
